Sites Professionals has many years of experience with Department of Mental Health documentation and reimbursement practices.

How we are Different

There are many varieties of staffing, recruitment and locum tenens businesses out there. Most of these businesses are taking advantage of inefficiencies in the market by casting a wide net of poorly matched agencies and practitioners, while providing little to no support after placement. Sites Professionals puts a tremendous effort into matching qualified candidates with agencies, and we work in partnership with practitioners and agencies for the duration of placements.

Partnering with Us

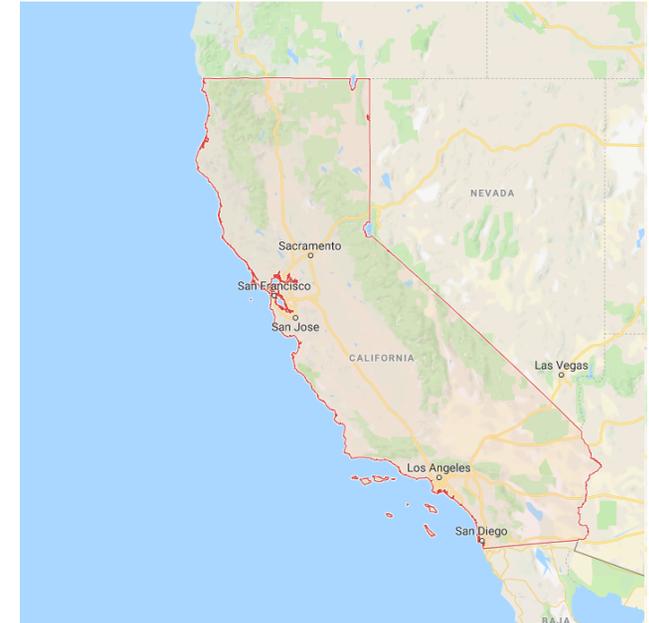

Think of Sites Professionals as augmenting your portfolio with part-time or full-time flexible assignments. Before the placement begins we conduct full credentialing, provide you with occurrence-based malpractice insurance, and assist with setup of telepsychiatry and EHR training. Once a placement has begun we continue to provide technical support as needed, handle time cards and billing, and remain responsive and engaged.

Telepsychiatry

Telepsychiatry is one way to ensure clients have access to psychiatric care, particularly at locations or times that could otherwise make it difficult for in-person coverage. Based on your needs and the agency, telepsychiatry may be a good fit for your placement with us. Sites Professionals will work to provide you with the tools and support you need to work from home.

Recruitment

Sometimes employment is the way to go. Sites Professionals recruits for agencies that wish to hire psychiatric practitioners.

Locally Owned & Operated

Sites Professionals is based in Greater Los Angeles, we specialize in servicing mental health agencies in the state of California.
